

Get Help Putting Technology in Your School

No matter which step of your school's technology adoption journey you're on, we have online tools to help you select, deploy, and learn how to use Microsoft technology.

Check out the online tools below.

01 Explore

At the beginning of your journey, while you're looking at technology solutions, these resources can help you evaluate how the technology supports your learning goals.

Explore cloud-based services, devices, purchasing options, and information for IT.

Find the right Windows 10 device for your school, starting at \$219 USD.

Education Experts can answer all your questions, demonstrate technology, and connect your school to more resources.

Learn how your school can stay on the cutting edge of classroom technology and best prepare your students for success—now and into the future.

Follow step-by-step instructions to implement Microsoft Education services, including Office 365 Education.

02 Deployment

The next step of your journey, setting up your devices, software, and services, doesn't have to be difficult. These tools can help guide you.

Get expert onboarding assistance from Microsoft FastTrack engineers over the phone.¹

Connect with other IT pros to discuss challenges, solutions, and best practices for IT in the education sector.

Install Microsoft Intune for Education to streamline user, device, and app management.

Activate School Data Sync to automate the synchronization of Student Information System (SIS) data with Office 365.

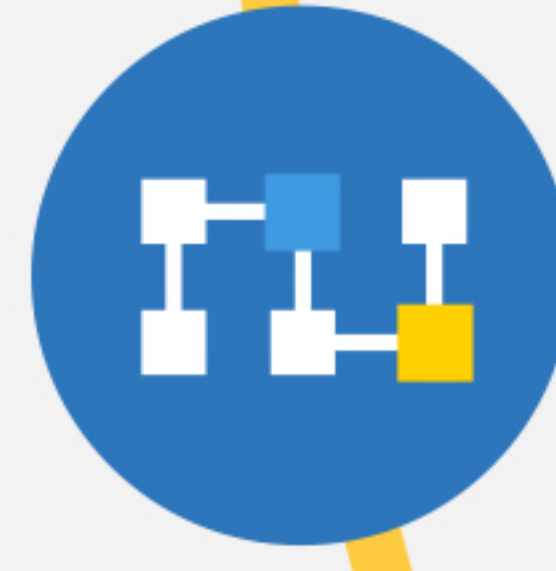

Access free on-demand training and professional development credits for teachers.

03 Training

The final step of your journey is to get teachers comfortable using the technology in their classroom. These resources can accelerate teacher training and classroom integration.

Get in-person technical support, participate in workshops, troubleshoot devices, and more at a Microsoft Store.

Show teachers how to use Office 365 apps in the classroom with these step-by-step guides.

Get training for Office 365 apps including Teams, OneDrive, and OneNote.

Find a training partner for professional development in classroom apps.
